

Refuelling Services

Following an emergency callout to a standby generator which had been refuelled through the rocker box cover, FDL now offers a professional small quantity (up to 1000 litres) refuelling service.

Our highly trained personnel will ensure that the generator fuel is kept in the fuel tanks - and not the engine

FDL Generators – There when you need us

For standby diesel generators and UPS systems visit www.fdlpower.co.uk
